

List of active United States military aircraft

The United States Armed Forces uses a wide variety of military aircraft across the respective aviation arms of its various service branches. The numbers of specific aircraft listed in the following entries are estimates from published sources and may not be exhaustive.

For aircraft no longer in service, see the list of military aircraft of the United States.

Air Force

Aircraft are listed in the table below alphabetically by the 1962 United States Tri-Service aircraft designation system "Basic Mission" or "Vehicle Type" code (ignoring preceding "Modified Mission" or "Status Prefix" codes), then serially by "Design number", then alphabetically by "Series letter" and lastly alphabetically by "Modified Mission" or "Status Prefix" code when applicable. Aircraft without a 1962 Tri-Service designation system designation are listed alphabetically at the end of the table.

 - c. Originally, the Navy planned to have two variants of the Hornet: the F-18 fighter and A-18 light attack aircraft. During development, "F/A-18" was used as a shorthand to refer to both variants. When the Navy decided to develop a single aircraft able to perform both missions, the "F/A" appellation stuck despite the designation system not allowing for slashes or other characters.^[95]
