

# RBK-500

---

**RBK-500** is a Russian 500 kg cluster bomb.<sup>[1][2]</sup> It carries 15 "Motiv-3" SPBE-D antitank submunitions developed by NPO Bazalt with dual-mode infrared homing system.<sup>[3]</sup> It entered service with the Soviet Air Force in 1987.<sup>[4]</sup>

In November 2023, during the Russo-Ukrainian war, Russian forces reportedly began deploying RBK-500s fitted with *Unifitsirovannyi Modul Planirovaniya i Korrektsii* (UMPK) standoff glide bomb kits against Ukrainian forces in Donetsk Oblast, near Staromaïorske. It was the first time RBK-500s fitted with UMPKs were seen being used on publicly-available video.<sup>[5]</sup>
