Ottawa, ON K2K2E6

Re: Software Developer (JOB ID#149599)

Dear Hiring Manager,

I am writing to express my interest in your position listing for Software Developer at Nokia, which I was made aware of through the Co-operative Education Office at Carleton University. I am presently enrolled in Carleton University's Computer Science Bachelor's program in the Artificial Intelligence and Machine Learning stream, with relevant experience in microservice and native application development from personal projects. I believe I am a strong candidate for this position due to my experience and personal interest in application development.

Through the Introduction to Software Engineering course at Carleton University, I have developed a foundational understanding of software design practices and the practical implementation of design patterns with appropriate data structures and algorithms to solve real-world problems efficiently. Having completed Carleton's Fundamentals of Web Applications course, I have applicable knowledge for your position as it relates to working with a team of backend developers from working with REST APIs. In addition, from my experience taking the Introduction to Systems Programming course I have experience working on projects with clear specifications, constraints, and deadlines. With respect to personal projects, I have experience making salient tickets using JIRA for the development of my website, versioning codebases using Git, and have experience contributing to existing open-source code on my Github page.

Nokia is one of the market leaders in mobile and cloud infrastructure and has an asset value of approximately \$40B. I have no doubt the scale of networking infrastructure and systems required for data processing is staggering. I am excited by the prospect of working on problems of this scale and believe I would be a valuable team member in developing your customer-facing cloud software.

Thank you for your consideration. I hope to correspond with you in the near future regarding my suitability for the position.

Best Regards,
Peter Tran

EDUCATION

Bachelor of Computer Science, A.I Stream, Co-op Option

September 2024-Present

Carleton University, Ottawa, ON

- Second year standing, 10.85/12 (A-)
- Scholarships: Hamlin Family Scholarship, Harmer Family Academic Excellence Scholarship
- Expected Graduation Date: April 2029

AVAILABILITY

Available for 4 months beginning January 2026

RELEVANT SKILLS, EXPERIENCES AND ACCOMPLISHMENTS

Technical Skills

- Designed and distributed multi-platform web application using Flutter framework, to launch an application accessible on mobile devices and computers, reducing the project complexity typically associated with multi-platform applications
- Programmed video game using Godot Engine's GDScript scripting language with extension code written in C++ to optimize performance where GDScript was insufficient
- Programmed system application that models radar cross-section of 3D models using C++ and frameworks to assist with the design of stealth drone airframes
- Assembled home web server using desktop hardware and Ubuntu Server operating system to self-host home business web application, vertically integrating the software stack thereby eliminating cloud hosting expenses
- Implemented full-stack web application with REST API and CRUD operations in Javascript using Node.js framework to add web store functionality to home web server

Communication Skills

- Authored documentation for project codebases by embedding README files in projects, providing users with instructions to successfully build and deploy software
- Recruited and integrated new members into an open source project by developing an onboarding process, to expand the group of maintainers working on the codebase
- Collaborated with a classmate on the design and production of an application for a systems programming course to develop multithreaded software according to specifications
- Fluent in all aspects of English and French communication with native proficiency
- Authored bug reports as issues on GitHub repositories that were understood and approved by project maintainers to highlight problems requiring attention

APPLIED PROJECTS

Web Developer

January 2025-Present

Personal Business Website

- Investigated and identified website design best practices by recreating user interfaces from Amazon and Ebay to ensure high user retention and end-user familiarity with website interface
- Assigned and delegated tasks to collaborators by JIRA and Microsoft Teams to increase productivity and hasten development of website
- Devised and maintained unit test code using Node.js test runner to ensure web application code is robust and bug-free
- Designed and implemented website backend using Node.js server with SQLite database to support CRUD database operations necessary to process inventory and store transactions
- Surveyed and addressed customer complaints by sending out emails soliciting feedback for improving website

Games Programmer

December 2024-Present

Quadcopter Drone Simulator Game

- Designed and implemented drone simulation control systems and flight controls interface to effectively train players to fly drones
- Analyzed and assessed the most popular commercial drones on the market, to determine which drones would be most relevant for users to learn
- Dissected and analyzed commercial drone 3D models by reverse-engineering dimensions, providing players with 1:1 scale models with true flight characteristics
- Enlisted and collaborated with users through feedback surveys to determine issues with the simulator and receive feature suggestions

Product Designer

September 2024-Present

Drones Accessories and Car Parts

- Assessed and collected popular accessories and parts by gathering sales data from Ebay and Amazon to determine most viable products for the market
- Designed and engineered CAD models of drone accessories and car parts by reverse engineering parts dimensions to make parts useful to consumers
- Operated and maintained fleet of 3D printers by researching 3D printer settings and best practices to establish a reliable vertically integrated manufacturing supply chain
- Devised and integrated JIT manufacturing by adopting Kanban scheduling for lean manufacturing, making production more Agile
- Reviewed and addressed critical feedback from customers and end-users to modify designs and prevent defects and failures of the original design

RECORD OF GRADES

Peter Tran

Bachelor of Computer Science, 2nd Year Standing
Artificial Intelligence and Machine Learning Stream
Carleton University

Cumulative Grade Point Average: 10.85/12 (A-)
Number of Academic (4 month) Terms Completed: 2
Co-op (4 Month) Work Terms Completed: 0
Graduation Date: April 2029

Course Number	Course Name	Letter Grade
Year One:		
COMP1005	Introduction to Computer Science I	A+
COMP1006	Introduction to Computer Science II	A+
COMP1805	Discrete Structures I	C
MATH1007	Elementary Calculus I	A+
MATH1104	Linear Algebra for Engineering or Science	A-
FYSM1900	Selected Topics In the Study of Academic Discourses	A+
Year Two:		
COMP2401	Introduction to Systems Programming	A+
COMP2402	Abstract Data Types and Algorithms	A
COMP2404	Introduction to Software Engineering	A+
COMP2406	Fundamentals of Web Applications	A+
STAT2507	Introduction to Statistical Modeling I	F
MATH2107	Linear Algebra II	In Progress
COMP2804	Discrete Structures II	In Progress
COOP1000	Co-operative Education	In Progress
Year Three:		
COMP3000	Operating Systems	In Progress

Software Developer Co-op

Nokia | Ottawa, ON

Job ID: 149599

Duration of Job: 4 months

Come create the technology that helps the world act together

We are a B2B technology innovation leader pioneering the future where networks meet cloud.

At Nokia you will have a positive impact on people's lives and help build the capabilities needed for a more productive, sustainable, and accessible world.

Be part of a culture built on an inclusive way of working where we are open to your ideas, you are empowered to take risks and are encouraged to be fearless in bringing your authentic self to work.

Cloud and Network Services

As Nokia's growth engine, we create value for communication service providers and enterprise customers by leading the transition to cloud-native software and as-a-service delivery models. Our inclusive team of dreamers, doers and disruptors push the limits from impossible to possible.

Position: Software Developer Co-op/Intern

Duration: 4 Months

Location: Flexible (Hybrid in Ottawa, Canada or Virtual in Canada)

What you will learn and contribute to

As part of the team, you will:

- Be part of an agile team responsible for the design, development and testing of the Home Device Manager (HDM) product
- Building and deploying microservices with RESTful APIs
- Writing and executing unit tests. Identifying and implementing opportunities to enhance test infrastructure and automation coverage
- Deploying, running and troubleshooting cloud-native applications in containers, e.g. Docker, Kubernetes
- Creating/maintaining Confluence pages, creating PowerBI dashboards

Your skills and experience

Education Recommendations:

Currently a candidate for a Bachelor's degree or diploma in Computer Science, Software Engineering or a related field with an accredited school in Canada.

You have:

- Strong understanding of object-oriented design, data structures, and algorithms
- Self-driven, analytical and results-oriented with proven sound judgment
- Strong written and oral communication skills

It would be nice if you also had:

- Experience using Linux and Windows
- Experience with Java, J2EE
- Experience with test automation development or development in general
- Experience with Automation Framework like Selenium, Cucumber

What we offer

Nokia offers flexible and hybrid working schemes, continuous learning opportunities, well-being programs to support you mentally and physically, opportunities to join and get supported by employee resource groups, mentoring programs and highly diverse teams with an inclusive culture where people thrive and are empowered.

- **Company Culture:** We believe our people are our greatest asset, and we aim to foster a fun, challenging, positive, and inclusive work environment. We offer 1-on-1 mentorship, learning and development opportunities, global impact and interaction, and flexible work/life balance.
- **Meaningful Co-op Term:** During your co-op term, you will have the opportunity to test the latest technologies and work on innovative projects that could leave a global impact. You get to use skills learned in the classroom and apply them to real-world situations while gaining professional hands-on experience.

Nokia is committed to inclusion and is an equal opportunity employer

Nokia has received the following recognitions for its commitment to inclusion & equality:

- One of the World's Most Ethical Companies by Ethisphere
- Gender-Equality Index by Bloomberg
- Workplace Pride Global Benchmark

At Nokia, we act inclusively and respect the uniqueness of people.

Nokia's employment decisions are made regardless of race, color, national or ethnic origin, religion, gender, sexual orientation, gender identity or expression, age, marital status, disability, protected veteran status or other characteristics protected by law.

We are committed to a culture of inclusion built upon our core value of respect. Join us and be part of a company where you will feel included and empowered to succeed.
