

.300 Norma Magnum

The **.300 Norma Magnum**, also known as **.300 NM** or **300 Norma**, is a centerfire magnum rifle cartridge developed by Swedish ammunition manufacturer Norma Precision. The .300 Norma Magnum uses a .338 Norma Magnum case necked down to .30 caliber,^[1] named to differentiate it from the older .308 Norma Magnum designed in 1960, and has begun to gain popularity among long-range shooters. According to the official C.I.P. (English: Commission Internationale Permanente pour l'Epreuve des Armes à Feu Portatives) rulings the .300 Norma Magnum can handle up to 440.00 MPa (63,817 psi) P_{max} piezo pressure.^[2]

The United States Special Operations Command (USSOCOM) chose the new MK22 advanced sniperrifle, which is chambered in .300 Norma Magnum (designated **M1163**) as well as .338 Norma Magnum.^{[3][4][5]}
